

THE SUMMA FOUNDATION

Established in 2019 by Franco Summa himself, Summa Foundation is a non-profit organization with the mission of affirming, through art, collective values and promoting the quality of urban spaces.

The Foundation supports, especially among young people, initiatives aimed at affirming the awareness of everyone's responsibility towards the livability of urban places, highlighting the fundamental role of art in the aesthetic, symbolic, social and psychological qualification of places of collective life and personal. T

he Foundation aims to carry out - in Italy and abroad - activities that meet not only the authority and quality requirements, but also that are universally known and appreciated. The pursuit of public visibility and consensus, which the interlocutors of the Foundation will be able to express, derives from the activation of informative, motivational and participatory models that are able to represent and affirm the sharing of a common goal, with the same conviction as the Master that what makes a community alive is the commitment to the care and desire for beauty of shared spaces.

The headquarters of the Foundation is the Summa House Museum, a gift from the artist to the community, recognized as being of cultural interest by the Superintendence of Archeology, Landscape and Fine Arts of the Provinces of Chieti and Pescara. In this place, the Foundation organizes study and research seminars, specifically addressed to the younger generations. The House Museum offers a cosy space for meetings, making available the volumes from its extensive library, catalogs, publications on art, architecture, design, and the invaluable digital archive of the Master's works.
